NOVA

PATIENT MONITORING SOFTWARE

End to end, the world's most powerful remote patient observation solution

When You Can't Be Everywhere

Whether you're trying to reduce 1:1 patient sitters, decrease patient falls and injuries, or enhance workflow efficiency, Wachter's **NOVA Patient Monitoring Software** gives your facility a complete virtual window into the patient's condition and status.

Designed to leverage the benefits of network and clinical technology, **NOVA Patient Monitoring Software's** open architecture allows you to create a patient monitoring solution that will meet your facility's unique needs—now and in the future.

Unified real-time communication and notifications with patients and staff

Measurable and customizable patient auditing tools and reporting

Reliable real-time monitoring for quick interpretation and health decisions

Improve staff workflow with a centralized system for communicating patient status

Seamless data integration across multiple clinical systems

Customizable design layout and user experience

Unparalleled image detail with high resolution video and audio

Scalable to any size healthcare system
